## PIG LAUNCHER AND RECEIVER SKID

The pig launcher and receiver is an important process equipment for the launch and receive of pig cleaning equipment.

### Pig launcher and receiver skid device

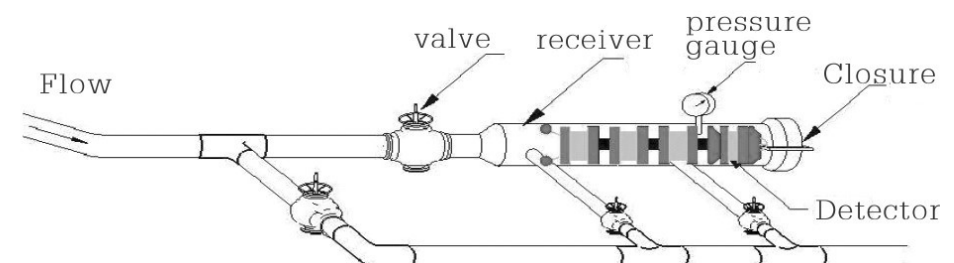

The skid pig launcher and receiver is an important process equipment that is suitable for a various of the launch and receive of pig cleaning equipment. Its main configuration is pig launcher and receiver, media into and out of the pipeline, drain pipe, vent pipe, explosion-proof passage indicator, Diameter valve, pressure gauge and so on, main features easy to transport and on-site installation.

Skid launcher

### Working principle

To the pipeline as the driving force of the original medium, to drive the pig launcher and receiver in the pipeline to run, so as to achieve the purpose of cleaning or inspection. The receiver should be fitted with a passage indicator to monitor if the cleaner pig has been received successfully in the launcher, to ensure safe operation. Quick opening closure can be achieved to launcher and receiver open and close the function quickly, can greatly enhance the efficiency.
